

BELGIAN  
WARMBLOOD  
Bred to Perform

# Linear profiling in the Belgian Warmblood

Stefaan De Smet (UGent, national BWP judge)  
Inge Meurrens (BWP breeding manager)  
Steven Janssens (KU Leuven, genetic evaluation)

5th International Workshop on Linear Profiling in the Warmblood Horse  
22<sup>nd</sup> - 23<sup>rd</sup> January 2019, Flyinge, Sweden

## Conformation & linear profiling

- Included in the breeding goal of BWP
  - Performance (jumping or dressage)
  - Health
  - Functional conformation
- Assessment @
  - Mare conformation and gaits contests
  - Free jumping and jumping under the saddle contests
  - Foal contests
  - Stallion selection (no linear profiling)

## Linear profiling @ mare contests

- Introduced in 2003
- Linear profiling on 9-point structured scale + measurement of height at withers
  - Type: 18 traits
  - Legs: 9 traits
  - Gaits: 8 traits (walk and trot)
  - Extreme phenotypes
- Mares of 3 and 4 years old
- Only scored once

E.g. Neck length

### TYPE

BODY SHAPE :

v.square   square   0   rectangle   v.rectangle

BODY DIRECTION :

v.downhill downhill   0   uphill   v.uphill

LENGTH OF LEGS :

v.short   short   0   long   v.long

HEAD SIZE :

v.small   small   0   big   v.big

HEAD-NECK :

v.light   light   0   heavy   v.heavy

NECK : Length :

v.short   short   0   long   v.long

Muscling :

v.poor   poor   0   heavy   v.heavy

Direction :

v.vertical   vertical   0   horizontal   v.horizontal

WITHERS: Height :

v.flat   flat   0   high   v.high

Length :

v.short   short   0   long   v.long

SHOULDER : Direction :

v.straight   straight   0   sloping   v.sloping

Length :

v.short   short   0   long   v.long

BACK : Length :

v.short   short   0   long   v.long

Line :

v.deep   deep   0   straight   v.straight

LOINS :

v.weak   weak   0   strong   v.strong

CROUP : Slope :

v.straight   straight   0   sloping   v.sloping

Length :

v.short   short   0   long   v.long

MUSCULARITY HIND :

v.short   short   0   long   v/long

Condition :

l.poor   poor   v.poor

l.heavy   heavy   v.heavy

Head convex :

little   much   v.much

Jaws :

l.heavy   heavy   v.heavy

Set of neck :

l.deep   deep   v.deep

**LIMBS**

POSITION FORELEGS :        
 v. over at knee over at knee 0 back at knee v.back at knee  
       
 v.inward inward 0 outward v.outward

POSITION HINDLEGS:        
 v.curved curved 0 straight v.straight

POSITION HOCKS:        
 v.inward inward 0 outward outward

POSITION PASTERNS :        
 v.weak weak 0 upright v.upright

HOOF SHAPE :        
 v.narrow narrow 0 wide v. wide

HEELS :        
 v.low low 0 high v.high

DEVELOPMENT LEGS :        
 v.light light 0 heavy v.heavy

QUALITY OF LEGS :        
 v.blurred blurred 0 lean v.lean

Forelegs standing under :        
 little much v.much  
 Canon bone front :        
 l.tied in tied in v. tied in

Hindlegs standing behind:        
 little much v.much

Canon bone hind :        
 l.tied in tied in v. tied in

Uneven shape hoof :        
 l.uneven uneven v.uneven

**GAITS**

WALK : Length of stride :        
 v.short short 0 long v.long  
 Impulsion Hind :        
 v.inactive inactive 0 active v.active  
 Suppleness :        
 v.elastic elastic 0 stiff v.stiff  
 Balance :        
 v.low low 0 much v.much

Irregular Rhythm :        
 little much v.much

TROT : Length of stride :        
 v.short short 0 long v.long  
 Impulsion Hind :        
 v.inactive inactive 0 active v.active  
 Suppleness :        
 v.elastic elastic 0 stiff v.stiff  
 Balance :        
 v.low low 0 much v.much

## Linear profiling @ jumping contests

- Introduced in 2003 for free jumping contests – 3 years old males and females
- Introduced in 2014 for jumping under the saddle – 5 years old males and females
- Linear profiling
  - (Free) jumping ability: 7 traits
  - Canter: 4 traits
- Only scored once

### SCOPE :

\_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ |  
 v.little    little    0    much    v.much

### TAKE-OFF :

\_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ |  
 v.little    little    0    much    v.much

### TECHNIQUE:

Forelegs : \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ |  
                   v.little    little    0    much    v.much

Back : \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ |  
                   v.little    little    0    much    v.much

Hindlegs : \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ |  
                   v.little    little    0    much    v.much

### WILLINGNESS :

\_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ |  
 v.little    little    0    much    v.much

### PRUDENCE :

\_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ |  
 v.little    little    0    much    v.much

### CANTER :

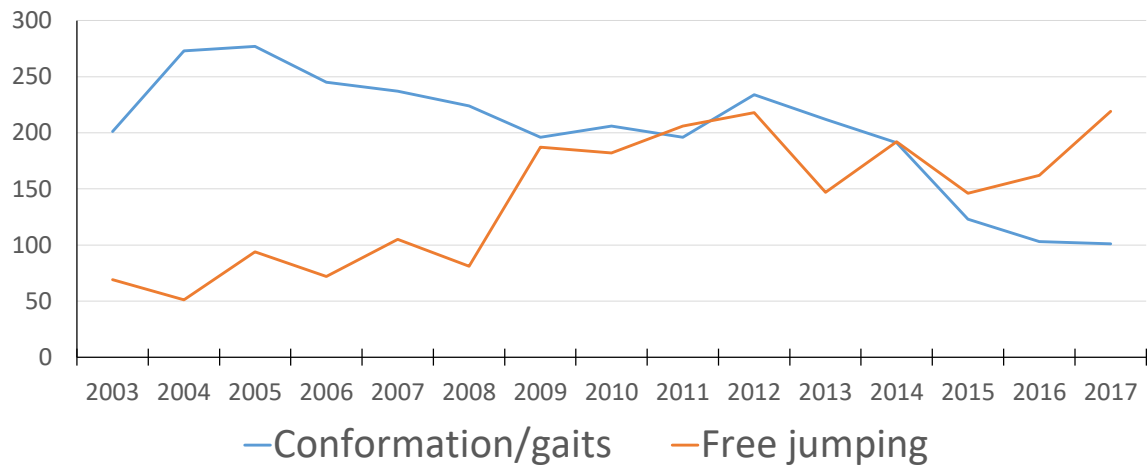

Length of stride : \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ |  
                           v.short    short    0    long    v.long

Impulsion: \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ |  
                   v.little    little    0    much    v.much

Suppleness : \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ |  
                   v.little    little    0    much    v.much

Balance : \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ | \_\_\_\_\_ |  
                   v.little    little    0    much    v.much

## Linear profiling : # horses scored / year

## Linear profiling @ foal contests

- Introduced in 2016
- Linear profiling
  - Type: 9 traits
  - Legs: 5 traits
  - Gaits: 5 traits (across 3 gaits)

## Linear profiling : participation

	Conformation and gaits	Free jumping	Jumping under saddle	Foals
<b>2016</b>	103	162	305	527
<b>2017</b>	101	219	407	557

Approximately 10 – 20% of the foals born

## Data processing and use

- Input in BWP system as scores between -20 and 20 around mean value 0
- Use
  - Information for breeders (direct return)
  - Evaluation of mothers of candidate stallions
  - Calculation of breeding values (for foal data to be developed)

## Challenges (1)

- Breeders' interest in and knowledge of linear profiling limited
- Participation at mare shows decreasing
  - Less linear profiling data available
  - Data become less representative for the population
- Large participation at (free) jumping and foal contests
  - Larger and more representative sample of population
  - On (free) jumping contests difficult or not possible to score type traits

## Challenges (2)

- Quality of the linear profiling data
  - Performed by national judges (# 9 total) on an irregular and voluntary basis
  - Training and maintaining expertise of the judges limited: max. 1 training / year
  - Extreme phenotypes seldom indicated
  - Available time on free jumping and foals shows limited
  - Impression that there is a large effect of age on several traits in foals (to be evaluated)
